TU senatorial candidate wants to ease tension on the ground

PRESIDENT MACAPAGAL-ARROYO'S EX-CHIEF OF STAFF yesterday conceded defeat in the senatorial elections, saying he wanted to ease the prevailing tension and to prevent possible "inimical acts" to get him into the winning circle.

Goodbye Lipo, Hello Ultrashape!

Ultrashape – Lipo Without The Suction continues to make waves in the slimming industry since its official launch in Manila early last year. Tagged as the first non-invasive breakthrough in body contouring, Ultrashape uses an ultrasound beam to breakdown and liquefy fats from outside the body. Promising an average reduction of about 2cm in just one treatment, it effectively reduces fat deposits on multiple body areas such as the tummy, flanks and thighs.

A small amount of fat reduction is just not worth undergoing surgery for. Liposuction usually involves massive body contouring, and is often not recommended when only a few inches of fat have to be removed. Thus, for the majority of people who only need a few touch-ups, Ultrashape offers a much safer alternative. It gives the benefits of liposuction without the risks or side effects, surgical scars and downtime. The result: Smooth, even and shapely curves you can flaunt even without your clothes on!

Due to its increasing popularity, demand for Ultrashape is high often resulting in fully booked appointment schedules from its growing roster of clients. These women have testified – they have finally found the best alternative to liposuction!

From page D1

They are also supposed to ensure that speed does not triumph over good sense and public welfare and safety. They cannot and should not just sit back as operators fill every empty space on a sea craft just because people are willing to take the risk with eyes wide open.

The Department of Tourism also has to take some measures. True, domestic tourism is now the local governments' responsibility. But foreign tourists have to travel to their destination of choice and they have to take these overloaded seacrafts and equally overloaded and dilapidated motor vehicles.

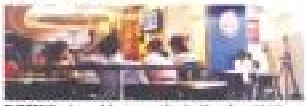

The DOT has to make sure visitors get to enjoy the sights they came here to see by working closely with the relevant agencies to ensure travel is safe for everyone.

How many more times do we have to read stories of boats and ships sinking because of overloading? Just because it happens all too often does not mean we should consider it already a fact of life.

This should not be a fact of life, people. This kind of complacency can kill.
